Managing Pro/ENGINEER data in Teamcenter

course code TR25930

user level Beginner

duration 1 day

In the **Managing Pro/ENGINEER data in Teamcenter** course you learn how to use the integration of Pro/ENGINEER CAD software and Teamcenter to create and manage Pro/ENGINEER parts and other engineering data. Hands-on activities demonstrate the concepts and procedures taught in this class

Notes:

- This is not a replacement course for Pro/ENGINEER software training
- This course can only be taught onsite at a customer's facility and will require Pro/ENGINEER software.

WHO SHOULD ATTEND	PRIMARY COURSE TOPICS
Authors	<ul style="list-style-type: none"> • Managing Pro/ENGINEER parts in Teamcenter • Managing Pro/ENGINEER assemblies in Teamcenter • Managing Pro/ENGINEER drawings in Teamcenter
PREREQUISITES	
Required courses: <ul style="list-style-type: none"> • Introduction to Teamcenter (TR25100) Along with basic experience using Pro/ENGINEER software.	
PROVIDED COURSE MATERIALS	
<ul style="list-style-type: none"> • Student Guide • Activity Material
